

THE DANBURY VOLKSWAGEN CORONET

The Danbury Volkswagen Coronet is designed to give maximum comfort and versatility. As standard we fit a full length side elevating roof, with upholstered double bed and access hatch. Full headlining throughout — and round the windows. Carpet trim to the side panels, floor and engine deck. Sliding window, Electrolux RM 122 refrigerator, Stainless steel two burner cooker with grill, and stainless steel sink/drain. Swivel cab seats, upholstered in wipe clean buttoned Dralon to match the rear settee and engine deck cushion.

The driver and passenger seats swivel, transforming the cab into a lounge so that the whole interior is used, and we supply a small coffee table to fit between the cab seats, as well as a larger table which is positioned in front of the rear settee.

The rear settee slides forwards and the back rest reclines to meet up with a deep foam cushion on the engine deck to form another comfortable double bed.

In short — the Danbury Coronet is a luxurious, pure camping vehicle with **no hidden extras**.
